

# Open Heritage Data

*Henriette Roued-Cunliffe, University of Copenhagen, Denmark*

*Open Heritage Data: An introduction to research, publishing and programming with open data in the heritage sector* has been written for practitioners, researchers and students working in the GLAM (Galleries, Libraries, Archives and Museums) sector who do not have a computer science background, but who want to work more confidently with heritage data. It combines current research in open data with the authors' extensive experience in coding and teaching coding to provide a step-by-step guide to working actively with the increasing amounts of data in their charge.

Coverage includes:

- An introduction to open data as a next step in heritage mediation
- A short overview of the laws most relevant to open heritage data
- An Open Heritage Data Model and examples of how institutions publish heritage data
- An exploration of use and reuse of heritage data
- Tutorials on visualizing and combining heritage datasets and on using heritage data for research
